## **Project Manager Electrical & Instrumentation (m/f)**

---

### **Profile**

You will be globally responsible for technical investment projects in the area Electrical, Instrumentation & Automation (EI&A). Your responsibilities will comprise the analysis of the project requirements, site inspections and during the project progression you will supervise the planning, procurement, establishment and implementation of the optimized technology in the company's own production plant. In addition, you will be accountable for set-up, commissioning and monitoring contractor services as well as for the preparation of specifications. Therefore, a permanent and independent project coordination and management are essential. You will act as an interface manager between the different disciplines.

### **Qualification**

You have a university diploma as an electrical engineer with focus on electrical and automation technology or a comparable education. Your major fields of study and competencies are process control and automation technology. You can rely on a profound knowledge in the area of electrical, instrumentation and automation technology, sensor systems and electrical actuators and you are familiar with the relevant standards and regulations. You should be strongly familiar with reading and interpreting circuit diagrams and construction plans. Furthermore, you should have a thorough knowledge of programming and understand the basic requirements of electrical explosion protection.

You think analytically and you are characterized by a high degree of commitment and responsibility. Your working approach is independent and proactive. You can get enthusiastic about a job in interdisciplinary teams. You are convincing by excellent communication and presentation skills and you are able to motivate and integrate others in processes. During your professional career you have already gained experience in project management and already worked in an international environment. To monitor the national and international sites, travel activity should be taken for granted in this function.

For this responsible position in a globally operating enterprise you need good German and English verbal and written communication skills. You are acquainted with computer applications, in particular with MS-Office products. SAP knowledge would be an asset.

If you like to enhance your responsibility in a growth-oriented company, please submit your complete application indicating the **key number (ID) WP 1321** – preferably by e-mail to [info@wpmb.de](mailto:info@wpmb.de) or by regular mail to the following address: Walter & Partner Management Consulting, Friedrichsplatz 1, 68165 Mannheim, Germany, attn. Mr. Jürgen Walter. For further information, please contact Mr. Jürgen Walter Tel. No.: 0049 (0) 621-300 99 400. We look forward to your detailed application!
